

DESCRIPTION

TACTICAL BLITZ® is a diverse and proven LCM that is made up of a proprietary blend of inert bridging materials in combination with sized nitrile crumb rubber (previously patented). Due to its inert makeup, TACTICAL BLITZ® can be pumped at high concentrations through the most complex downhole tools. More than a million sacks of Tactical Blitz have been pumped since 2010 curing thousands of wells with more than 60 prominent operators in every major US basin.

ADVANTAGES

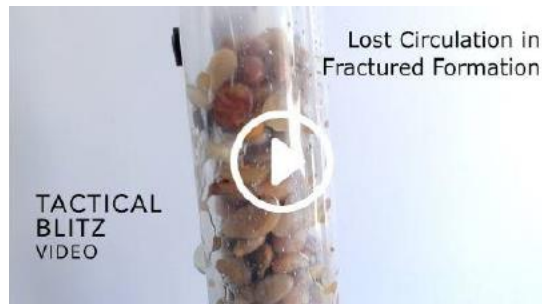

- Delivered blended and packaged as an “all-in-one-sack” solution.
- Compatible in all drilling fluids.
- Mixes easily with any rig equipment.
- Eliminates the need to TOOHS with directional BHA (up to 100 ppb) or RSS (up to 80 ppb) to heal total losses.
- Mitigates significant viscosity hump typically seen when pumping conventional or organic LCM through jewelry.
- Presents a large particle size distribution (PSD) to combat known and unknown fracture sizes.
- Eliminates the need for multiple LCM products on location minimizing rig space, waste, and NPT.
- Reduces transportation cost.
- Improves hole cleaning when pumped in sweeps.
- ESG friendly – Passes LC50.

APPLICATIONS

- Mild-to-Severe hourly loss Sweep Material.
- Severe-to-Total loss Pill Material.
- Casing Shoe Integrity Pill.
- Cement Spacer LCM.
- Dry Blended in cement slurries.

PHYSICAL PROPERTIES

- Black and grey powder
- Specific Gravity = 1.45 g/cm³
- Bulk Density = 34.2 lbs/ft³
- Return Permeability = 96%
- PSD Range = 37 μ to 3,360 μ
- PSD Average = 825 μ
- 50-lb sacks
- 50 sacks per pallet – US
- 40 sacks per pallet - International
